Online job postings

Online nurse vacancies

per month

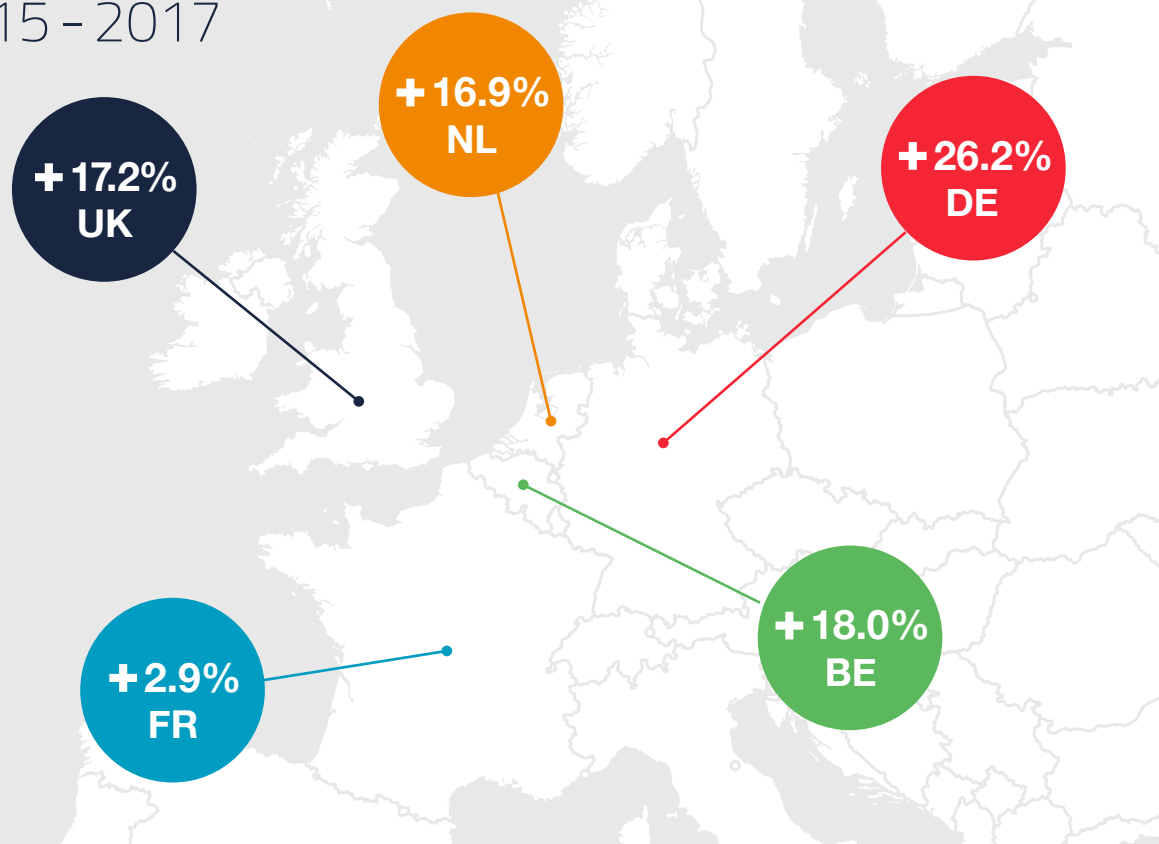

Nurse vacancies per 100,000 inhabitants

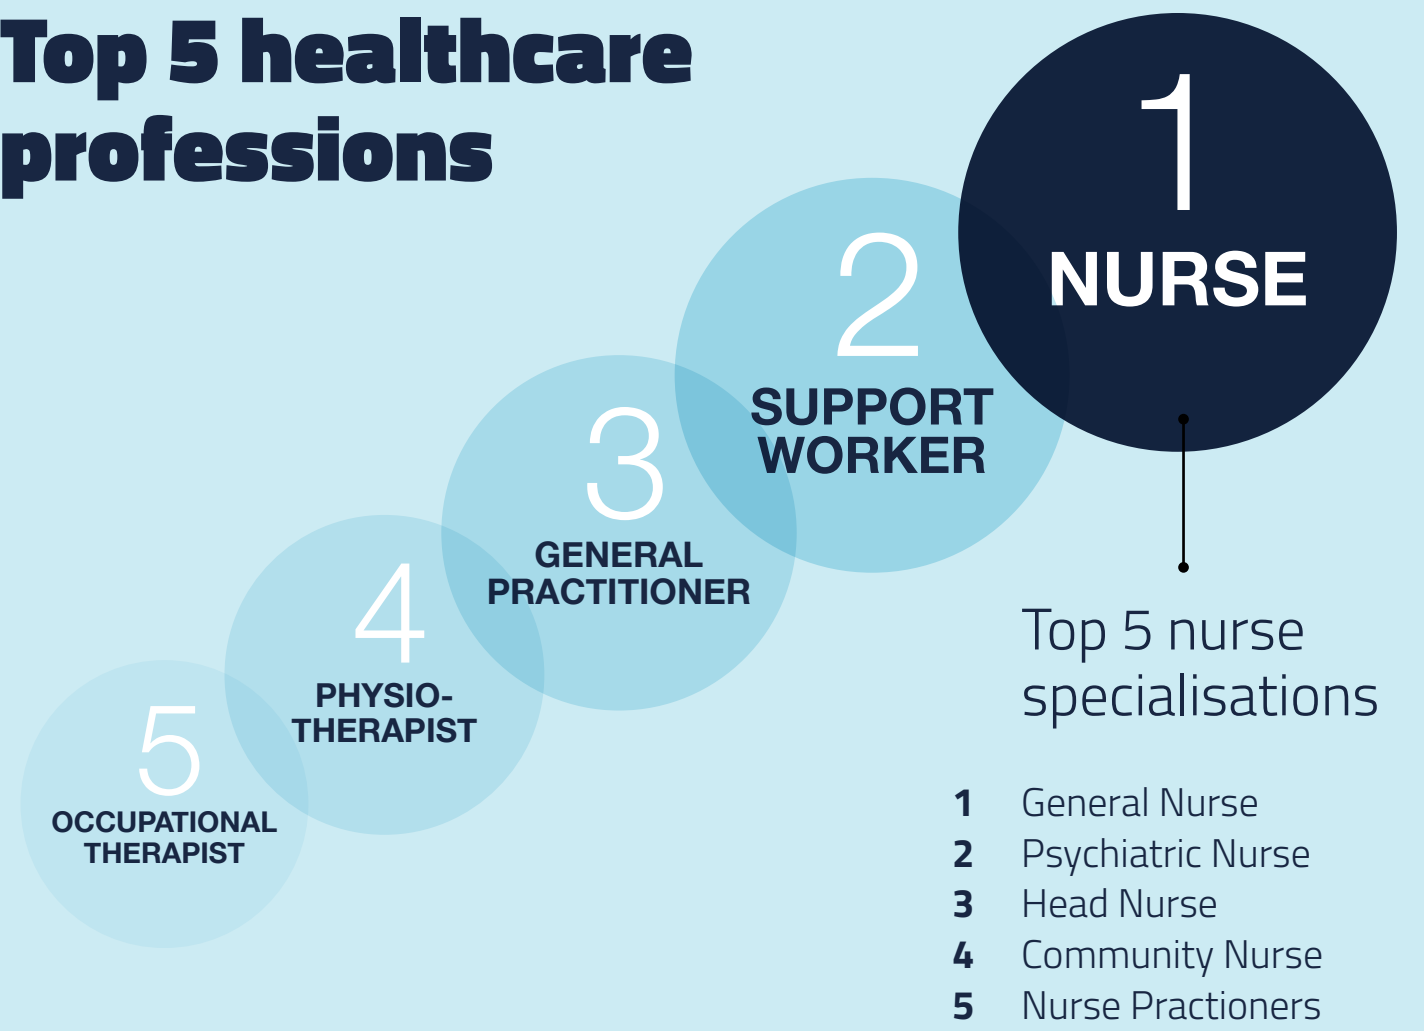

The UK has both the lowest number of nurses per inhabitant and the most vacancies posted online.

The increase in nurse vacancies

between 2015 - 2017

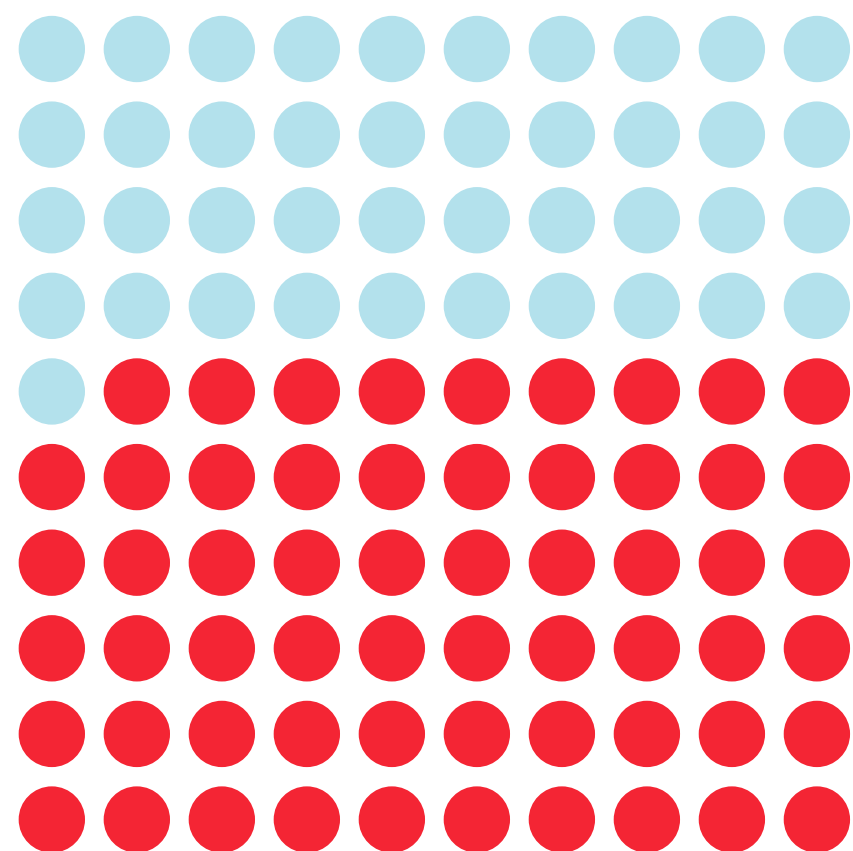

Top 5 healthcare professions

Job postings: agency vs direct employer

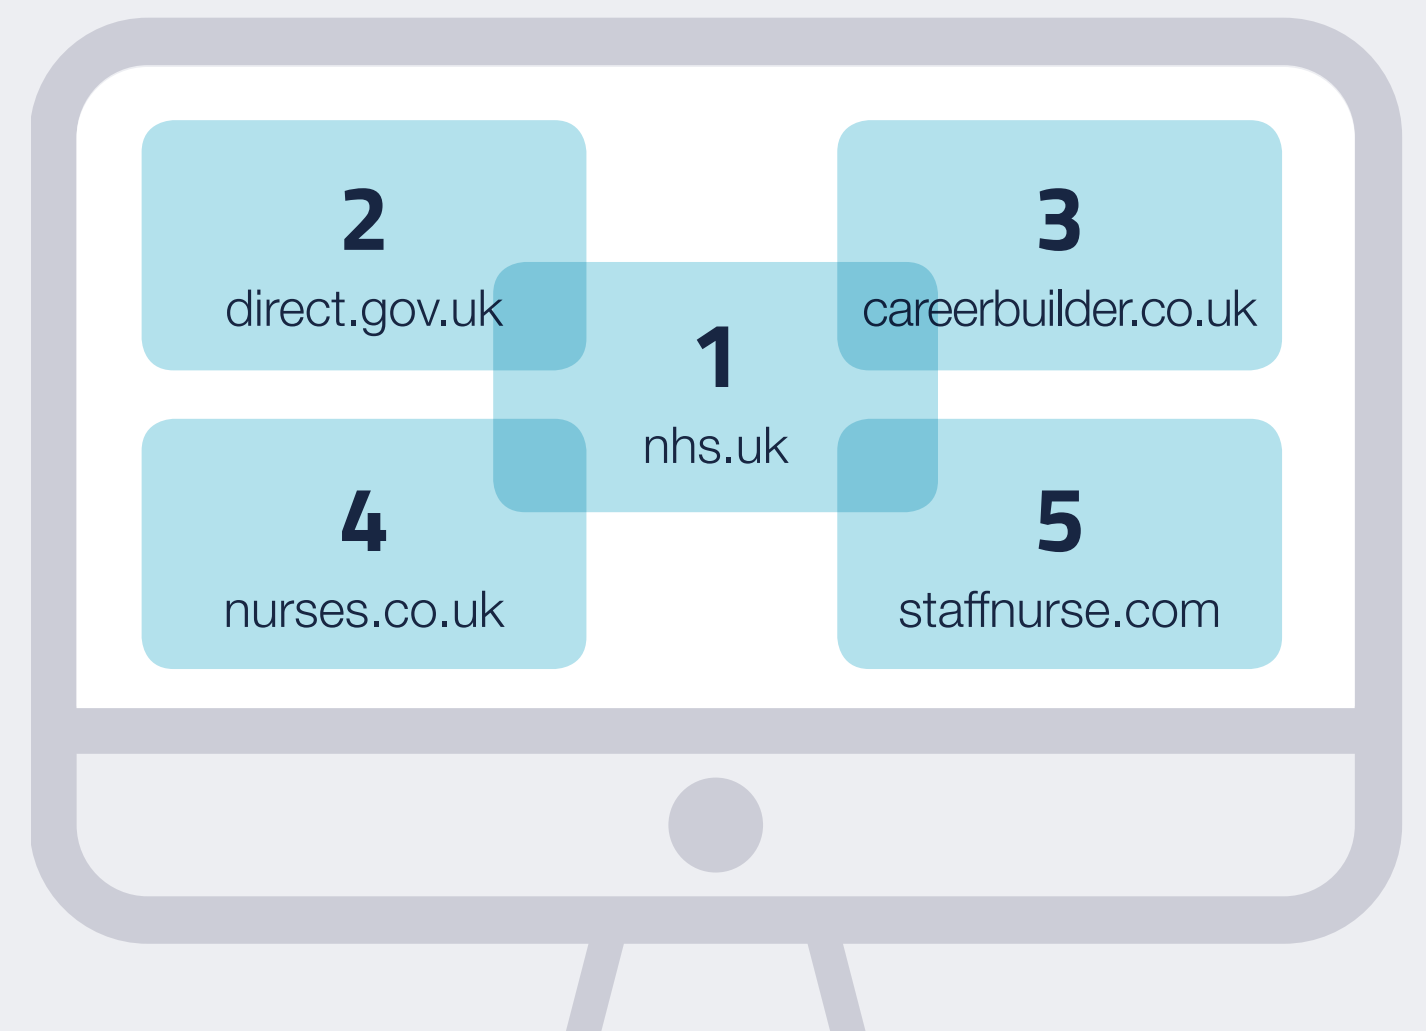

Direct employer 40.88%

Almost 60% of the online vacancies are posted by staffing or recruitment agencies

Staffing / Recruitment agency 59.12%

Websites with the most nurse vacancies

Source
Numbers come from Jobfeed, Textkernel's searchable job database for lead generation, competitive insights and labour market analysis. For this analysis, online vacancy postings for nurses, posted between the 01 November 2015 and 31 October 2017 have been analysed, categorised and de-duplicated. The resulting list of unique vacancies, excluding franchise, internships/postgraduate positions, voluntary work, freelance jobs and apprenticeships, is the source from which these analyses have been performed. The latest report from the OECD, Health at a Glance 2017, is the source of the numbers on working nurses per 100,000 inhabitants.
